

Year 2 - Week Beginning 9.3.2026

RE

This week we will begin to think about the life of Jesus leading up to Holy week. We will find out what happened when he visited Jerusalem and discuss Palm Sunday.

Maths

This week we will be looking at our 2 times table. We will be multiplying and dividing by 2 and linking this learning to doubles and halves.

English

We will write a recount about World Book Day.

Science

This week is Science Week. The theme is 'curiosity: what's your question?'. We will be thinking about what scientists do and relating this to our work about materials.

DT

We will be looking at famous buildings and structures from around the world, investigating their features and trying to make them with lego.

History

In History this week we will find out what happened after the Great Fire of London.

Computing

We will be asking clear questions to collect data and record responses in a tally chart.

PE

In games we will develop our passing skills by using eye contact and a swinging motion to pass the ball with two hands. We will practise this both static and on the move in small groups.

We will continue to practise our Great Fire of London dance.

PSHE/RSE

Emotional wellbeing

Another one of our differences means that we all have different feelings and that other people's feelings may not be the same as ours.
